### Week 1 Exercises 1

1. A Checked Exceptions Must be either caught or declared by throws. This would include file not found exceptions. An Unchecked Exception Descend from runtimes and won't force you to catch the exception. This would include a divide by zero exception.
2. If there is no catch clause the program will be terminated, and an error code will appear in the console log.
3. No because a simple catch IOExceptions can be used to catch and the .printStackTrace (); can be used to debug the exception.
4. This is in its own .java file.
